Contents of Volume 24

No. 1,2

I. Steiner, J.G. Spivack, A. Jackson, E. Lavi and N.W. Fraser (U.S.A.)
Effects of lipofuscin on in situ hybridization in human neuronal tissue 1

E. Weiss and M.H.V. Van Regenmortel (France)
Use of rabbit Fab′-peroxidase conjugates prepared by the maleimide method for detecting plant viruses by ELISA 11

P.D. Reuman, S. Keely and G.M. Schiff (U.S.A.)
Assessment of signs of influenza illness in the ferret model 27

G.L. Woods and A.M. Johnson (U.S.A.)
Rapid 24-well plate centrifugation assay for detection of influenza A virus in clinical specimens 35

G. Gerna, A. Sarasini, A. Di Matteo, M. Parea, M. Torsellini and M. Battaglia (Italy)
Rapid detection of human rotavirus strains in stools by single-sandwich enzyme-linked immunosorbent assay systems using monoclonal antibodies 43

D.D. Erdman, G.W. Gary and L.J. Anderson (U.S.A.)
Development and evaluation of an IgM capture enzyme immunoassay for diagnosis of recent Norwalk virus infection 57

G. Spickett, R.E. Beattie, L. Bountiff, A.G. Dalgleish and A.D.B. Webster (U.K.)
Quantitation of HIV-1 activity in tissue culture supernatants: effects of culture condition on syncytial assays and virus production 67

P. Dulieu and M. Bar-Joseph (Israel)
Rapid isolation of double stranded RNA segments from disulphide crosslinked polyacrylamide gels 77

G.R. Pietroboni, G.B. Harnett and M.R. Bucens (Australia)
Centrifugal enhancement of human immunodeficiency virus (HIV) and human herpesvirus type 6 (HHV-6) infection in vitro 85

L. Hammar, S. Eriksson, K. Malm and B. Morein (Sweden)
Concentration and purification of feline leukaemia viris (FeLV) and its outer envelope protein gp70 by aqueous two-phase systems 91

G.M. Beards and U. Desselberger (U.K.)
Determination of rotavirus serotype-specific antibodies in sera by competitive enhanced enzyme immunoassay 103

D.R. Dahling, G. Sullivan, R.W. Freyberg and R.S. Safferman (U.S.A.)
Factors affecting virus plaque confirmation procedures 111

U. Hørding, A. Sebbelov, S. Daugaard, J.E. Bock and B. Norrild (Denmark)
Filter in situ hybridisation: an evaluation of the FISH technique for HPV detection in cervical swabs 123

G.A. Toranzos and C.P. Gerba (U.S.A.)
An improved method for the concentration of rotaviruses from large volumes of water 131

M. Welnicki, J. Skrzeckzkowski, A. Sołtynska, P. Jończyk, W. Markiewicz, R. Kierzek, B. Imołcyk, W. Zagórski (Poland)
Characterization of synthetic DNA probe detecting potato spindle tuber viroid 141

F. Vlaspolder, E. Donkers, T. Harmsen, C.A. Kraaijeveld and H. Snippe (The Netherlands)
Rapid bioassay of human interferon by direct enzyme immunoassay of encephalomyocarditis virus in HEp-2 cell monolayers after a single cycle of infection 153

S.S.-L. Chen and A.S. Huang (U.S.A.)
Human cervical carcinoma cell lines contain an antigen identical to the tumor-specific 75 kDa antigen of HeLa cells: detection by viral acquisition 159

P. Qvist, K.J. Sørensen and A. Meyling (Denmark)
Monoclonal blocking ELISA detecting serum antibodies to the glycoprotein gII of Aujeszky's disease virus 169

G.M. Allan, D. Todd, J.A. Smyth, D.P. Mackie, J. Burns and M.S. McNulty (Ireland, U.K.)
In situ hybridization: an optimised detection protocol for a biotinylated DNA probe renders it more sensitive than a comparable ^{35}S-labelled probe 181

G. Frisk, E. Nilsson, A. Ehrnst and H. Diderholm (Sweden)
Enterovirus IgM detection: specificity of μ-antibody-capture radioimmunoassays using virions and procapsids of Coxsackie B virus 191

K.S. Mohan and K.P. Gopinathan (India)
Quantitation of serological cross-reactivity between two geographical isolates of *Oryctes* baculovirus by a modified ELISA 204

C.F. Farquhar, R.A. Somerville and L.A. Ritchie (U.K.)
Post-mortem immunodiagnosis of scrapie and bovine spongiform encephalopathy 215

A.Q. Zhang, J.R. Smith and G.W. Burgess (Australia)
A capture antibody ELISA for detection of antibodies against bovine enterovirus (Short Communication) 223

P.R. Young (U.K.)
An improved method for the detection of peroxidase-conjugated antibodies on immunoblots (Short Communication) 227

E. Weiland, H.-J. Thiel, G. Hess and F. Weiland (F.R.G.)
Development of monoclonal neutralizing antibodies against bovine viral diarrhea virus after pretreatment of mice with normal bovine cells and cyclophosphamide (Short Communication) 237

No. 3

J.D. Connor and P. Walpita (U.S.A.)
Identification of herpes simplex viruses by automated profile analysis of viral proteins 245

B. Delord, J.-D. Poveda, T. Astier-Gin, S. Gerbaud and H.J.A. Fleury (France)
Detection of the bunyavirus Germiston in VERO and *Aedes albopictus* C6/36 cells by in situ hybridization using cDNA and asymmetric RNA probes 253

M. Blanchard-Channell and J.L. Stott (U.S.A.)
Bluetongue virus propagation and plaque assay: variation due to medium and serum supplement 265

A. Bauer, O Erlwein, U. Ehrmann and G. Jahn (F.R.G.)
Discrimination of HIV-1 and HIV-2 infection based on recombinant immunoblots 275

M. Oglesbee, L. Tatalick, S. Ringler, J. Rice and S. Krakowka (U.S.A.)
Rapid isolation of morbillivirus nucleocapsid for genomic RNA cDNA cloning and the production of specific core protein antisera 285

C.P. Kimpton, D.J. Morris and G. Corbitt (U.K.)
Inhibitory effects of various anticoagulants on the infectivity of human cytomegalovirus 301

V. Player and D. Westmoreland (U.K.)
Rapid diagnosis of adenovirus pharyngoconjuctival fever: use of a monoclonal antibody-based ELISA test during an outbreak 307

B. Ziola, M. Morhart, L. Gilbert, B. Karvonen and X. Ping Chen (Canada)
Replication of measles virus in the human plasma cell leukemia-derived LICR-LON-HMy2 cell line 313

E. Korec, J. Korcová, J. König and I. Hložánek (Czechoslovakia)
Detection of antibodies against hepatitis B core antigen using the avidin-biotin system 321

M. Musiani, M. Zerbini, G. Gentilomi, M. Plazzi, G. Gallinella, D. Gibellini and M. La Placa (Italy)
An amplified dot immunoassay for the direct quantitation of adapted and wild strains of human cytomegalovirus 327

C.P. Kimpton, G. Corbitt and D.J. Morris (U.K.)
Detection of cytomegalovirus DNA using probes labelled with digoxigenin 335

C.S. Luciano, K.S. Gibb and P.H. Berger (U.S.A.)
A general method for the detection of potyviral gene products in plant protoplasts and tissue 347

Subject index

Acute gastroenteritis, Human rotavirus, Single-sandwich ELISA, Monoclonal antibody, Capture antibody, Detector antibody, 43
Adenovirus, Pharyngoconjuctivitis, ELISA, Rapid diagnosis, 307
***Aedes albopictus* C6/36**, Asymmetric RNA probe, In situ hybridization, Bunyavirus Germiston, 253
Anti-PrP serum, Scrapie, BSE, PrP, 215
Antibody, Immunoblot, Dot-blot, Peroxidase substrate, Dengue virus, 227
Antibody detection, Bovine enterovirus, IgG f(ab′)2, Capture antibody ELISA, 223
Anticoagulants, Human cytomegalovirus, Viremia, 201
Antigenic cross-reactivity, Modified ELISA, *Oryctes* baculovirus isolate, Total antigenic reactivity, 203
Aqueous two-phase system, Virus purification, Retrovirus, Feline leukemia virus, Envelope protein, 91
Asymmetric RNA probe, In situ hybridization, *Aedes albopictus* C6/36, Bunyavirus Germiston, 253
Aujeszky's disease, Monoclonal antibody, Blocking ELISA, Glycoprotein gII, 169
Automation, Herpes simplex virus, Viral protein, Virus identification, 245
Avidin-biotin system, ELISA, Hepatitis B, 321

BSE, Scrapie, PrP, Anti-PrP serum, 215
Biotin, Cytomegalovirus, DNA hybridisation, Digoxigenin, ^{32}Phosphorus, 335
Biotinylated DNA probe, In situ hybridization, Monoclonal antibody, Egg drop syndrome virus, 181
Blocking ELISA, Monoclonal antibody, Aujesky's disease, Glycoprotein gII, 169
Bluetongue virus, Serum extender and supplement, Minimal essential medium, RPMI 1640, 265
Bovine enterovirus, Antibody detection, IgG f(ab′)2, Capture antibody ELISA, 223
Bovine viral diarrhea virus, Immunotolerance, Cyclophosphamide, Neutralizing monoclonal antibody, 237
Bunyavirus Germiston, Asymmetric RNA probe, In situ hybridization, *Aedes albopictus* C6/36, 253

Capture antibody, Human rotavirus, Acute gastroenteritis, Single-sandwich ELISA, Monoclonal antibody, Detector antibody, 43
Capture antibody ELISA, Bovine enterovirus, Antibody detection, IgG f(ab′)2, 223
Cell line, Retrovirus, HIV-I, CD4, Immunoassay, 67
Centrifugal enhancement, Human immunodeficiency virus, Human herpesvirus-6, 85
Concentration, Rotavirus, recovery from water, 131
Coxsackie, RIA, IgM, Echo, Procapsid, 191
Cyclophosphamide, Bovine viral diarrhea virus, Immunotolerance, Neutralizing monoclonal antibody, 237
Cytomegalovirus, DNA hybridisation, Digoxigenin, Biotin, ^{32}Phosphorus, 335
Cytomegalovirus, Dot immunoassay, Direct quantitation, 327

DAS-ELISA, Tobamovirus, Fab′ conjugate, Maleimide conjugation method, 11
DNA hybridisation, Cytomegalovirus, Digoxigenin, Biotin, ^{32}Phosphorus, 335
cDNA cloning, Isolation, Morbillivirus nucleocapsid, Specific antiserum, 285

Dengue virus, Immunoblot, Dot-blot, Peroxidase substrate, Antibody, 227
Detector antibody, Human rotavirus, Acute gastroenteritis, Single-sandwich ELISA, Monoclonal antibody, Capture antibody, 43
Digoxigenin, Cytomegalovirus, DNA hybridisation, Biotin, ^{32}Phosphorus, 335
Direct quantitation, Dot immunoassay, Cytomegalovirus, 327
Disulphide crosslinked polyacrylamide gel, dsRNA separation, Subgenomic messenger, Electrophoresis, 77

Dot-blot, Immunoblot, Peroxidase substrate, Antibody, Dengue virus, 227
Dot-blot, PSTV, Viroid, Molecular hybridization, Synthetic DNA probe, 141
Dot immunoassay, Cytomegalovirus, Direct quantitation, 327

ELISA, Adenovirus, Pharyngoconjuctivitis, Rapid diagnosis, 307
ELISA, Avidin-biotin system, Hepatitis B, 321
ELISA, VSV, HeLa tumor-specific antigen, Human cervical carcinoma cell line, Western blotting, Human papillomavirus, 159
ELISA Tobacco vein mottling virus, Potyvirus, Protoplast, Immunostaining, Tobacco etch virus, 347
Echo, RIA, IgM, Coxsackie, Procapsid, 191
Egg drop syndrome virus, In situ hybridization, Biotinylated DNA probe, Monoclonal antibody, 181
Electrophoresis, Disulphide crosslinked polyacrylamide gel, dsRNA separation, Subgenomic messenger, 77
Encephalomyocarditis virus, Interferon bioassay, Monoclonal antibody, Recombinant gamma interferon, Recombinant alfa-2a interferon, 153
Envelope protein, Aqueous two-phase system, Virus purification, Retrovirus, Feline leukemia virus, 91
Expression cloning, HIV-1 and HIV-2, Recombinant antigen, β-Gal fusion protein, Immunoblot, 275

Fab' conjugate, Tobamovirus, DAS-ELISA, Maleimide conjugation method, 11
False-positive, Virus confirmation, Plaque picking, Storage, 111
Feline leukemia virus, Aqueous two-phase system, Virus purification, Retrovirus, Envelope protein, 91
Ferret, Influenza, Symptoms and signs, 27
Filter in situ hybridization, Human papillomavirus, 123

β-Gal fusion protein, HIV-1 and HIV-2, Expression cloning, Recombinant antigen, Immunoblot, 275
Glycoprotein gII, Monoclonal antibody, Blocking ELISA, Aujeszky's disease, 169

HIV-I, CD4, Retrovirus, Immunoassay, Cell line, 67
HIV-1 and HIV-2, Expression cloning, Recombinant antigen, β-Gal fusion protein Immunoblot, 275
HeLa tumor-specific antigen, VSV, Human cervical carninoma cell line, ELISA, Western blotting, Human papillomavirus, 159
Hemagglutinin, Measles virus, Virus production, Suspension cell, LL2 cell, Human plasma cell, 313
Hepatitis B, ELISA, Avidin-biotin system, 321
Herpes simplex virus, Viral protein, Virus identification, Automation, 245
HIV-1 and HIV-2, Expression cloning, Recombinant antigen, β-Gal fusion protein, Immunoblot, 275
Human cervical carcinoma cell line, VSV, HeLa tumor-specific antigen, ELISA, Western blotting, Human papillomavirus, 159
Human cytomegalovirus, Anticoagulants, Viremia, 301
Human herpesvirus-6, Human immunodeficiency virus, Centrifugal enhancement, 85
Human immunodeficiency virus, Human herpesvirus-6, Centrifugal enhancement, 85

Monoclonal antibody, Blocking ELISA, Aujeszky's disease, Glycoprotein gII, 169
Monoclonal antibody, Human rotavirus, Acute gastroenteritis, Single-sandwich ELISA, Capture antibody, Detector antibody, 43
Monoclonal antibody, In situ hybridization, Biotinylated DNA probe, Egg drop syndrome virus, 181
Monoclonal antibody, Influenza A, Rapid detection, Plate centrifugation, 24-well, 35
Monoclonal antibody, Interferon bioassay, Encephalomyocarditis virus, Recombinant gamma interferon, Recombinant alfa-2a interferon, 153
Morbillivirus nucleocapsid, Isolation, cDNA cloning, Specific antiserum, 285

Neurovirology, In situ hybridization, Human nervous system, RNA, Lipofuscin, 1
Neutralizing monoclonal antibody, Bovine viral diarrhea virus, Immunotolerance, Cyclophosphamide, 237

Oryctes baculovirus isolate, Modified ELISA, Antigenic cross-reactivity, Total antigenic reactivity, 203

PSTV, Viroid, Dot-blot, Molecular hybridization, Synthetic DNA probe, 141
Peroxidase substrate, Immunoblot, Dot-blot, Antibody, Dengue virus, 227
Pharyngoconjuctivitis, Adenovirus, ELISA, Rapid diagnosis, 307
^{32}Phosphorus, Cytomegalovirus, DNA hybridization, Digoxigenin, Biotin, 335
Plaque picking, Virus confirmation, False-positive, Storage, 111
Plate centrifugation, 24-well, Influenza A, Rapid detection, Monoclonal antibody, 35
Potyvirus, Protoplast, Immunostaining, ELISA, Tobacco vein mottling virus, Tobacco etch virus, 347
PrP, Scrapie, BSE, Anti-PrP serum, 215
Procapsid, RIA, IgM, Coxsackie, Echo, 191
Protoplast, Potyvirus, Immunostaining, ELISA, Tobacco vein mottling virus, Tobacco etch virus, 347

RIA, IgM, Coxsackie, Echo, Procapsid, 191
RNA, In situ hybridization, Human nervous system, Neurovirology, Lipofuscin, 1
dsRNA separation, disulphide crosslinked polyacrylamide gel, Subgenomic messenger, Electrophoresis, 77

RPMI 1640, Bluetongue virus, Serum extender and supplement, Minimal essential medium, 265
Rapid detection, Influenza A, Plate centrifugation, 24-well, Monoclonal antibody, 35
Rapid diagnosis, Adonovirus, Pharyngoconjunctivitis, ELISA, 307
Recombinant antigen, HIV-1 and HIV-2, Expression cloning, β-Gal fusion protein, Immunoblot, 275
Recombinant alfa-2a interferon, Interferon bioassay, encephalomyocarditis virus, Monoclonal antibody, Recombinant gamma interferon, 153
Recombinant gamma interferon, Interferon bioassay, Encephalomyocarditis virus, Monoclonal antibody, Recombinant alfa-2a interferon, 153
Retrovirus, Aqueous two-phase system, Virus purification, Feline leukemia virus, Envelope protein, 91
Retrovirus, HIV-I, CD4, Immunoassay, Cell line, 67
Rotavirus, recovery from water, Concentration, 131
Rotavirus epidemiology, Rotavirus serotype, Rotavirus neutralizing antibody, Viral gastroenteritis, Rotavirus vaccine, 103
Rotavirus serotype, Rotavirus neutralizing antibody, Viral gastroenteritis, Rotavirus epidemiology, Rotavirus vaccine, 103
Rotavirus vaccine, Rotavirus serotype, Rotavirus neutralizing antibody, Viral gastroenteritis, Rotavirus epidemiology, 103
Rotavirus neutralizing antibody, Rotavirus serotype, Viral gastroenteritis, Rotavirus epidemiology, Rotavirus vaccine, 103

Scrapie, BSE, PrP, Anti-PrP serum, 215
Serum extender and supplement, Bluetongue virus, Minimal essential medium, RPMI 1640, 265
Single-sandwich ELISA, Human rotavirus, Acute gastroenteritis, Monoclonal antibody, Capture antibody, Detector antibody, 43
Specific antiserum, Isolation, Morbillivirus nucleocapsid, cDNA cloning, 285
Storage, Virus confirmation, Plaque picking, False-positive, 111
Subgenomic messenger, Disulphide crosslinked polyacrylamide gel, dsRNA separation, Electrophoresis, 77
Suspension cell, Measles virus, Virus production, LL2 cell, Human plasma cell, Hemagglutinin, 313
Symptoms and signs, Influenza, Ferret, 27
Synthetic DNA probe, PSTV, Viroid, Dot-blot, Molecular hybridization, 141

Tobacco etch virus, Potyvirus, Protoplast, Immunostaining, ELISA, Tobacco vein mottling virus, 347
Tobacco vein mottling virus, Tobacco etch virus, Potyvirus, Protoplast, Immunostaining, ELISA
Tobamovirus, DAS-ELISA, Fab′ conjugate, Maleimide conjugation method, 11
Total antigenic reactivity, Modified ELISA, Antigenic cross-reactivity, Oryctes baculovirus isolate, 203

VSV, HeLa tumor-specific antigen, Human cervical carcinoma cell line, ELISA, Western blotting, Human papillomavirus, 159
Viremia, Human cytomegalovirus, Anticoagulants, 301
Viral gastroenteritis, IgM ELISA, 57
Viral gastroenteritis, Rotavirus serotype, Rotavirus neutralizing antibody, Rotavirus epidemiology, rotavirus vaccine, 103
Viral protein, Herpes simplex virus, Virus identification, Automation, 245
Viroid, PSTV, Dot-blot, Molecular hybridization, Synthetic DNA probe, 141
Virus confirmation, Plaque picking, False-positive, Storage, 111
Virus identification, Herpes simplex virus, Viral protein, Automation, 245
Virus production, Measles virus, Suspension cell, LL2 cell, Human plasma cell, Hemagglutinin, 313
Virus purification, Aqueous two-phase system, Retrovirus, Feline leukemia virus, Envelope protein, 91

Western blotting, VSV, HeLa tumor-specific antigen, Human cervical carcinoma cell line, ELISA, Human papillomavirus, 159
